16 February 2010

To whom it may concern,

This letter is to clarify the lot number system used by Mineral Resources International, Inc. (MRI) for elete. The master batch lot number is five digits long, beginning with "016-". The next two digits are the specific batch number; for example, "A0" is the first batch made in 2010 and A1 is a second batch of 2010. The subsequent digit(s) are purely for internal tracking/testing purposes; e.g., "016-A02" differs from "016-A04" only in the lab, and both come from the same physical batch with no modifications or alterations whatsoever.

Thank you,

A handwritten signature in purple ink that reads "Kris McDonald".
